PROBLEM STATEMENT

- No dedicated Community Platform for learning collaboratively

- Lack of Proper Guidance/ Mentorship for students

- No Peer-Learning Environment in some colleges & schools

- Lack of Awareness about relevant opportunities like Events, Scholarships and Technical Programs

- Less/ No Interaction of aspiring candidates with Industry Professionals

- Distributed and unorganised resources

PROPOSED SOLUTION

LearnTEZZ is an interactive web platform where students and professionals from different technical backgrounds can come together to learn, share and connect.

- Users can create and view posts regarding upcoming events, scholarships, technical programs or job openings and also get their doubts resolved

- Users can filter mentors on the basis of parameters like Technical Skills, College, Gender etc.

- Through dedicated chat room for each technology, users can ask doubts or help others

- Leveraging user-privacy options, users can choose to hide their personal information
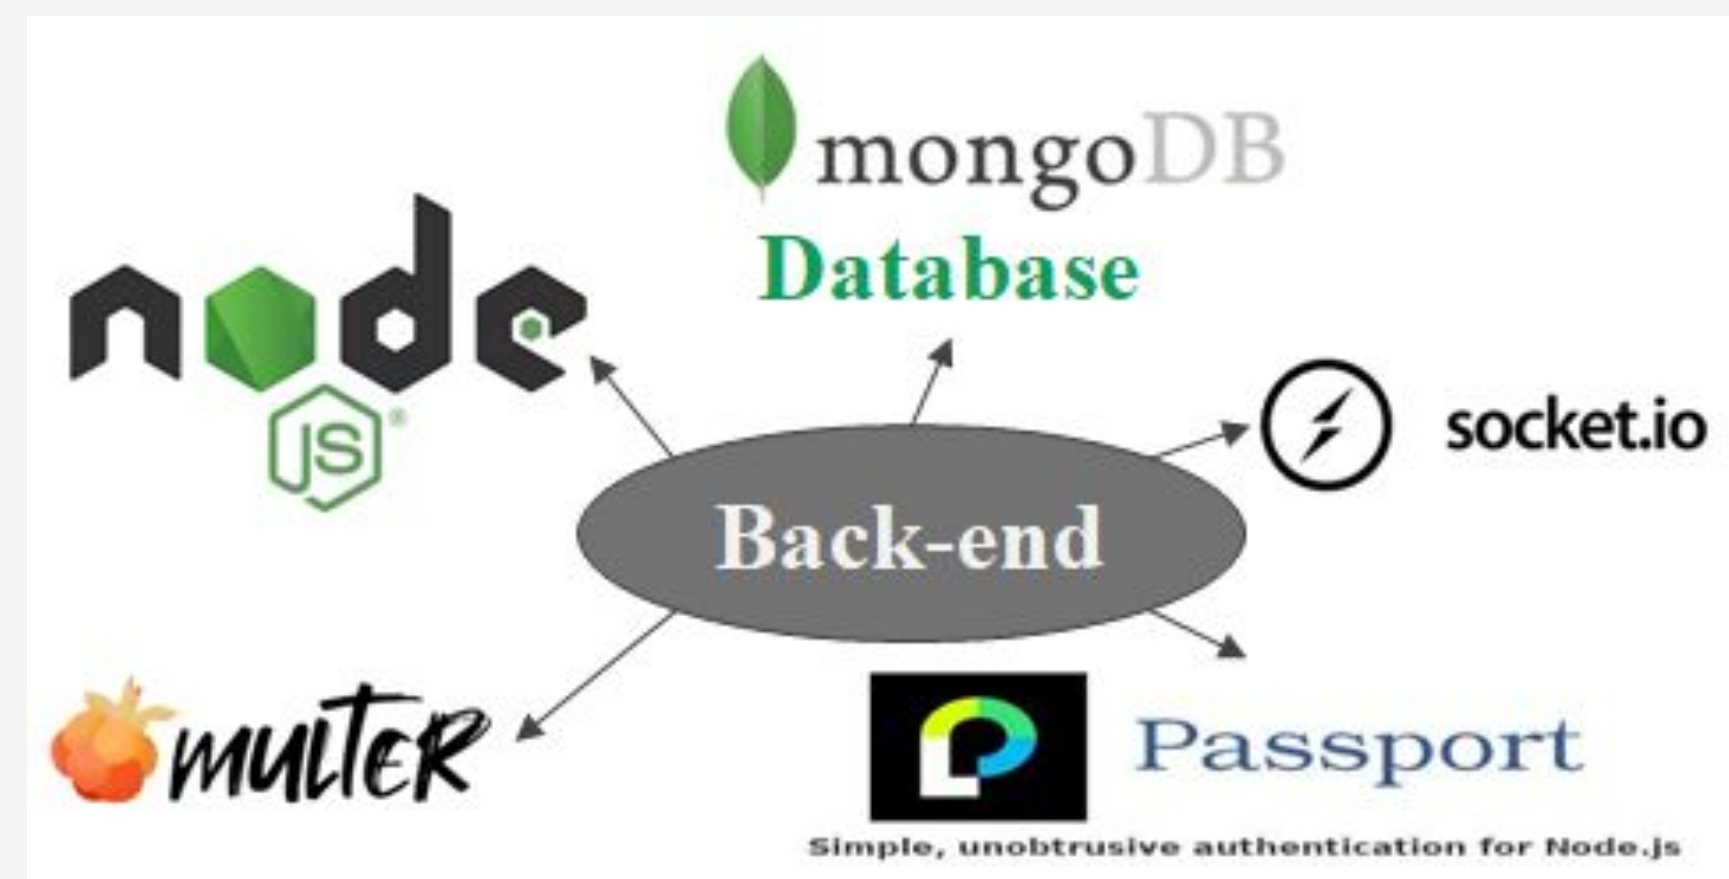

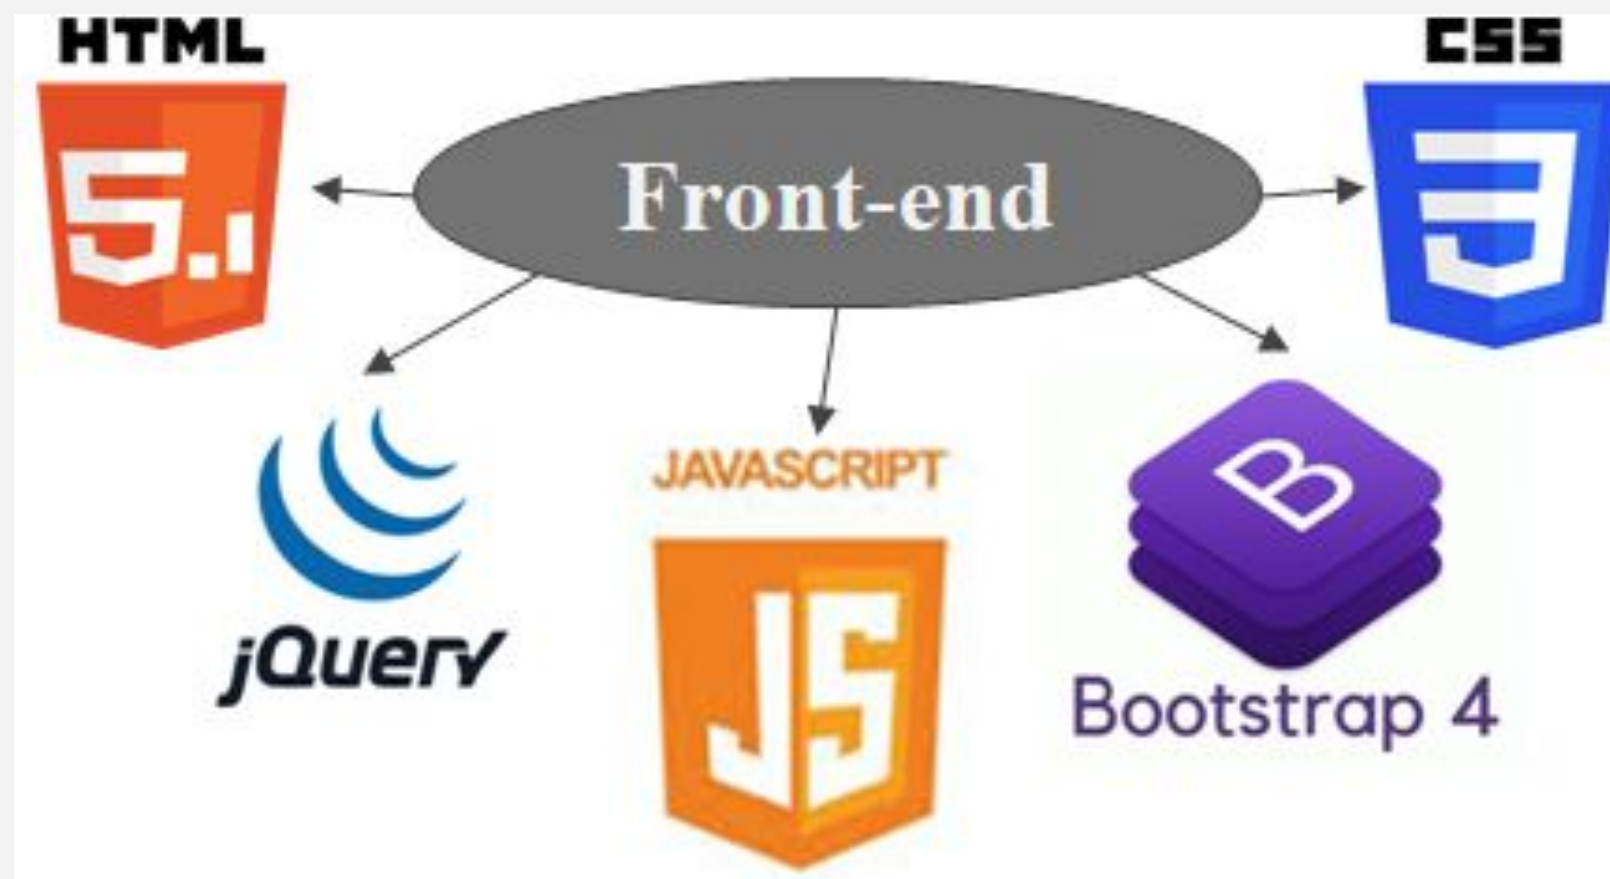

UNIQUE SELLING POINTS

1. Makes E-Learning more **accessible** and inclusive during unprecedented times

2. Helps students find and connect with their **ideal mentors** from the industry

3. Facilitates **collaborative learning** through **dedicated circles** for different technologies like Machine Learning, Android Development, AR/VR etc.

4. Provides **information** about upcoming events, scholarships, and other relevant **opportunities**

5. Offers enhanced **User-Privacy** by providing users the provision to restrict visibility of few fields from their profile

6. Considering the recent change in education policy which introduces coding from class 6, our platform will **bridge the gap** between the currently followed curriculum and industry standards
